Re: New website

Mr. Shirey,

Web Connectivity appreciates the opportunity to provide this estimate for a new website, mobile app, support and hosting for IBEW 575.

Web Connectivity delivers customized websites and application support for hundreds of local unions across the US. We provide our locals with a full suite of IT services, that include: custom website design, mobile apps, support and hosting; custom application development and support; IT outsourcing; Content Management System product that supports specific website applications; and Helpdesk IT support. Our highly skilled team utilize the most current application development and technology approach to deliver high quality solutions to our clients.

This pricing has been generated for IBEW Local 575 and is the general pricing guide from Web Connectivity, generated in September 2020.

The majority of the items listed below can be selected a la carte. The Core Website Functions selected for the website will be available on the App, if that is selected.

Before we begin work, we will issue a formal Statement of Work that both parties will sign stating the agreed upon work to be completed. More requirements will be gathered and timelines established.

If there are any questions, please do not hesitate to call us at (317) 920-0234.

We look forward to working with you and IBEW 575 on this project.

Keri Lubovich
